AKZENT – *Balm for wood*

AKZENT OIL IN ONE COLOR is a coloured impregnating oil, based on natural oils. It is used on parquet, cork and wooden floors in living areas and commercial buildings. The pigmented product does not contain any lead or cobalt driers.

This oil is multifunctional. The product can be used on its own, but can also be reworked with other oils or sealants.

Its ease of application without the need for a primer or intermediate sanding saves time and money. The finished surface feels velvety, is water-repellent and insensitive to dirt. If you

wish to make a customised colour shade, you can mix any colours and the colourless AKZENT OIL IN ONE together. Discover new possibilities.

For improved abrasion resistance and faster drying, AKZENT OIL IN ONE COLOR can be mixed together in a ratio of 10:1 with AKZENT OIL HARDENER. This is recommended in particular if the ambient climatic conditions when and after applying the oil are not ideal.

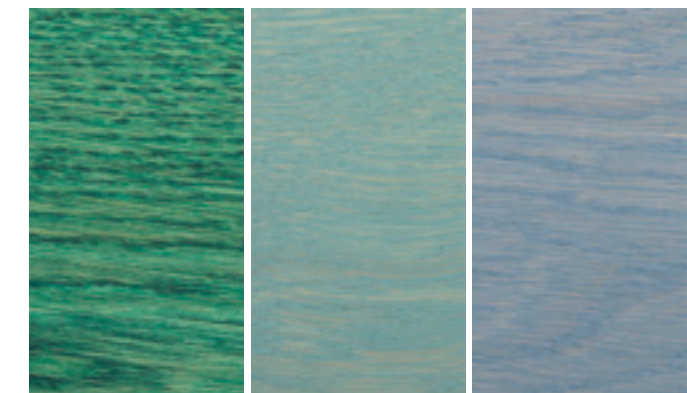

Liability exclusion: The colour samples shown here are for orientation only and are not binding.
